

WOCA Oil Refresher

- combines optimum cleaning with a simultaneous re-application of oil

- Ensures maximum dirt and water-resistance from day one
- Enhances the natural colour to the wood
- Cleans and maintains the floor gently
- Leaves a mat protecting oil film on the wood surface
- Certified by IBR

Product info

Container: 250 ml, 1 litre and 2,5 litre
Consumption: 150-200 m²/litre
Available in white and natural

Application area

WOCA Oil Refresher is a mild maintenance agent for the cleaning and maintenance of oiled and waxed wood floors. Oil Refresher Natural is used for naturally oiled wood floors or for wood floors oiled with Colour Oil, whereas WOCA Oil Refresher White is especially suitable for white oiled wood floors. WOCA Oil Refresher combines optimum cleaning with a simultaneous re-application of oil. The oil component provides the surface of the wood with an additional mat protective film.

The maintenance with Oil Refresher may also be carried out only partially.

Result

Using WOCA Oil Refresher helps the wood preserve its glow and natural colours even after multiple application, because the oil penetrates the wood and simultaneously generates a new protective mat oil film on the surface. Using a tradi-

tional floor soap could give the floor a slightly desiccated appearance, because the soap inevitably absorbs the oil.

Application

Use a mop or a cotton cloth.

After care

Not required.

Maintenance and cleaning

Oiled wood floors may be regularly treated with WOCA Natural Soap Natural or White and with WOCA Maintenance Oil or Paste - depending on the exposure once in a year in residential areas and more often in the case of wood floors in commercial areas which are more exposed to hard-wear. WOCA Oil Refresher does not replace the original treatment with maintenance oil, but it helps reducing the number of oil treatments.

How to do...

- WOCA Oil Refresher: combines optimum cleaning with a simultaneous re-application of oil

Tools

2 plastic buckets, mop, doodle-bug, floor cloth or the like.

Clean tools with water and soap.

Please notice!

Oil Refresher may not be used on lacquered surfaces!

Oil Refresher is used for regular cleaning and maintenance of oiled wood floors. Oil Refresher, Natural is typically used for natural oiled and colour oiled floors and Oil Refresher, White for white oiled wood floors.

Oil Refresher combines efficient cleaning with re-oiling as addition oil is penetrating into the wood of the floor forming a mat protective layer in the surface.

- 1 Shake the bottle well before use.
- 2 The floor must be free from dust before treatment.
- 3 Mix Oil Refresher with lukewarm water:
 - For traditionally oiled floors: 1:20 (250 ml Oil Refresher into 5 litres of water).
 - For UV-oiled and oil-waxed floors: 1:40 (125 ml Oil Refresher into 5 litres of water). The mixture ratio can vary depending on wear and requirement.
- 4 Treat with a light wrung floor cloth or mop lengthwise of the floor. Immediately afterwards, dip floor cloth or mop into mixture and wipe the floor with hard wrung floor cloth or mop again lengthwise of the wood. Use

two buckets - one with Oil Refresher mixed with water and one with rinsing water. It is recommended to clean an area of approx. 10 m² at the time. By doing it this way, the floor is exposed to moisture for a short period.

- 5 Leave the floor to dry for approx. two hours before use.
- 6 If a light shine is wanted, polish the dry floor with a white pad.

Note: Oiled wood floors can also be cleaned regularly with Natural Soap 'Natural' or 'White' and re-oiled with Maintenance Oil or Maintenance Paste at regular intervals in residential areas and more often in commercial areas. On surfaces exposed to extremely hard wear, the treatment can be only partially.
